## Uses

For chemoprophylaxis of P. falciparum malaria in adults.

## Format and Ingredients

Pinkish brown to brown coloured, circular, biconvex bevelled edge film-coated tablets with '404' debossed on one side and 'G' on the other side containing:

Atovaquone 250mg, Proguanil Hydrochloride 100mg,

## Dosage

Adults: 1 tablet daily taken at the same time each day with food or a milky drink (to ensure maximum absorption). Commence 1-2 days prior to entering a malaria-endemic area and continue during the period of the stay and for 7 days after leaving the area.
